EDUCATION

UNIVERSITY OF EDINBURGH

PHD IN SNOW HYDROLOGY
June 2016

LANCASTER UNIVERSITY

BSC IN ENVIRONMENTAL SCIENCE
June 2004

British Hydrological Society

SKILLS

COMPUTING

Operating systems:

Linux (Debian based) • Microsoft
Windows

Programming

R • SQL • \LaTeX • Git • Bash • HTML

Spatial:

QGIS • GRASS • ArcGIS • MapInfo Pro

Other:

Microsoft/Libre Office • Desktop
publishing, e.g. Scribus • Most
hydrological and hydraulic modelling
software, e.g. ISIS, HEC, FEH, TUFLOW

DATA

Types:

Gridded (e.g. satellite): NetCDF, rasters,
hdf, images • SQL/databases • Time
series • Numeric • Categorical (e.g.
social)

Abilities:

Mining/extraction • Wrangling/munging
• Management • Quality assurance •
Repeatability • Exploration • Analysis •
Modelling: statistics/physically
based/machine learning • Visualisation •
Forecasting • Interpretation • Insight

ABOUT

OVERVIEW

Mike research data scientist. His data analysis language of choice is R, but he is keenly developing other skills as projects require. He enjoys diverse work challenges and has been employed in the public, private and academic sectors, giving him the edge in situations that require quick learning and adaptability.

Mike provides data support to an economics and social science research group within Scotland's Rural College (SRUC). He provides expert advice to help colleagues scale their workflows and runs training sessions to researchers and students on databases, programming, GIS and others tools. His work at SRUC involves linking and analysing quantitative and qualitative data, to provide insight to Scottish Government policy.

INTERESTS

- Repurposing existing data to answer real world questions.
- Making data analysis scalable and repeatable.
- Using data science methods to improve workflows.

SKILLS PORTFOLIO

DATA ANALYSIS

- [These results](#) from an analysis of UK climate data show Mike's ability to fit a regression model across a number of factors. This analysis is hosted [here](#).
- Mike is currently working on a fuel poverty map using decision tree machine learning. This will be available soon.

DATA VISUALISATION

- Following snowfall across Britain in April 2016, Mike wrote [this blog post](#), which shows the frequency of monthly snow cover. It contains plots which visualise complex spatial and temporal data.
- Mike is building an interactive Shiny app to visualise summary data from the Snow Survey of Great Britain. This will be available soon.

PROGRAMMING

- Mike uses Git to version control his work. You can find him on [Github](#) and [Bitbucket](#), note that some repositories are private.
- Mike is active on Stack Exchange. Example answers include [raster resolution](#) and [working with logicals](#).

GIS

- [This GIS network analysis](#) shows the shortest road distance between 1.6 million GB postcodes and the closest train station. This analysis uses Ordnance Survey OpenData.
- An example of Mike's cartography skill is [this map](#), highlighting different elevations visible from a point in the Cairngorm mountains.

[Scottish snow - a viable dataset](#), International Glaciological Society, **Sep 2013**

RESEARCH

SRUC | RESEARCH DATA SCIENTIST

Jan 2017 ongoing | Edinburgh, Scotland

- Devised data strategy for research group.
- Expert data advice to approximately 30 researchers.
- Data linking and analysis of: animal movements, qualitative surveys, spatial data, environmental data, and others.
- Writing journal and policy briefing papers.
- Writing funding applications.

UNIVERSITY OF EDINBURGH | PhD

Sep 2011 - Jun 2016 | Edinburgh, Scotland

- Stochastic time series snow modelling and model build.
- Extreme value statistics of snow cover and melt.
- Spatial statistics modelling of snow cover dependence on large scale atmospheric circulation indicators (NAO).
- Analysis of Scottish satellite snow observation veracity.
- Data mining of historic Snow Survey of Great Britain dataset.

LISTED JOURNALS | REVIEWER

Climatic Change • Environmental modelling and software • Geoscientific model development

INDUSTRY

HALCROW GROUP LTD | SENIOR HYDROLOGIST

Sep 2008 - July 2011 | Edinburgh, Scotland

- Project lead for Scottish hydrological work.
- Training and mentoring of staff.
- Project and package management.
- Flood forecasting model design and build.
- Hydrological, hydraulic and GIS modelling and analysis.

ENVIRONMENT AGENCY WALES | HYDROLOGIST

Dec 2005 - Sep 2008 | Haverfordwest, Wales

- Extreme value flood statistics.
- Hydrology, hydraulics and GIS modelling and analysis, with quality assurance.
- Data management of flood risk assessments, models and spatial data.
- Flood warning duty officer, both forecasting and dissemination.

VOLUNTEERING

SCOTTISH YOUTH HOSTELS ASSOCIATION | DIRECTOR

Jun 2016 - June 2017 | Edinburgh, Scotland

- Co-opted to board.
- Responsible for governance of SYHA.
- Advertised, interviewed and appointed a new CEO.

SCHOOL OF GEOSCIENCES GRADSCHOOL | CHAIR

Feb 2012 - Jan 2013 | Edinburgh, Scotland

- Committee chair representing 200 GeoScience PhD students.
- Ran 3 day conference with 120 delegates from university and industry.
- Raised £15000 through industry sponsorship, as part of £25000 budget.

PERSONAL

Mike has been based on the outskirts of Edinburgh since Autumn 2008. He balances his work commitments with a young family, spending a day a week with his son. When he's not at a computer Mike can be found on a bike, mountain, up a ladder doing DIY or gigging as a trombonist.
